

Far Deep Void S2N2, vase

Duccio Maria Gambi

EDITION
Delvis () Limited - unique piece

FDV is a collection of sculptural vases literally emerging from a block of Polystyrene. The block is first melted on the inside through acetone to obtain a partially controlled void, where the flowing of a mass of concrete leaves some of its fluid on the inner rough surface, in the form of a thin layer.

DETAILS

BODY:	Pigmented concrete
SIZE:	L: 32 W: 23 H: 36 cm L: 12.60" W: 9.06" H: 14.17"
NET WEIGHT:	30 kg, 66.14 lb
YEAR:	2022
PRICE:	Upon request

QUOTE:

"The Far Deep Void collection uses synthetic materials to mimic the form of organic matter. The vases are made by creating a spontaneous mold from a block of polystyrene"
— Duccio Maria Gambi

Exhibition:

Metallica

NOV 24 // MARCH 25

Delvis Unlimited is pleased to introduce Metallica a new exhibition curated by Matteo Cibic, showcasing an interpretation of metal and its characteristics of ductility, malleability, reflection and shine, developing new forms of dialogue and symbiosis among different talented artists.

Metallica as a contemplation of energy translated into a contemporary aesthetic code embracing both Art and Design.

BIO DESIGNER:

Duccio approaches design from a variety of directions defining his practice across the wide edge between art and design. Since 2012 and the opening of his workshop in Paris, where he's been living for five years, in his projects for Galleries and private commissions he maintains a research-storytelling approach where every work stands as a momentary reflection in an endless research on structures, materials, processes, time, which he carries on in his actual atelier and studio in his hometown Florence. Big part of his works revolves around stone, concrete and the creation of value with poor materials through the artistic intervention.
