

## Unis, pendant

## Diaphan Studio

EDITION  
Delvis (Un)Limited

Unis is the unit cell of the Isos collection. It is inspired by the simplest and most common shape found in crystals and minerals, the cube. The geometry of the brass pendant is characterised by a thin frame, partially enclosed by square plates which are finished in a soft brushed texture.

### MORE INFO:

At a closer look, the cube cavity reveals a set of reflective surfaces. When the lamp is lit up, these mirrors interact with the light source, concealed beneath a translucent diffuser, shining in a gentle glow.

BIO DESIGNER:

Established in 2019, Diaphan Studio is an atelier based in Milan, founded by Alessandro Giacomelli and Dominique Wolniewicz, respectively a gemologist and a lighting designer. Their approach blends a deep exploration of light's optical properties with a contemporary interpretation of crystalline structures, often imperceptible to the human eye.

Each creation is a sculpture made of light, casting delicate projections into its surroundings. More than objects, these luminous works transform spaces, allowing light to unfold in a mesmerizing symphony of color and form.
